PREZ SAYS

APRIL 2026

When I think about our club, I don't just see fellow rock and mineral enthusiasts—I see an extended family. This group has been a place of connection, support, and shared passion, where everyone's curiosity is welcomed and celebrated. Whether we're hunting for specimens in the field, swapping stories about our finds, or marveling at a gem on display, there's a sense of camaraderie here that makes this more than just a hobby—it's a community that feels like home. Being part of this club reminds me how important it is to have people around who share your interests, encourage your learning, and celebrate your successes. The friendships we build here go beyond club meetings and shows—they carry into our daily lives, offering encouragement, inspiration, and laughter.

I'm grateful not only for the knowledge we exchange about rocks and minerals, but also for the support, generosity, and spirit of family that defines our club. It's this sense of belonging that makes every meeting, every field trip, and every show an experience I cherish deeply.

- Sara Verstuyft, President

April Birthstone & Flower

The April birthstone is the **diamond**; the flowers are the **daisy** and the **sweet pea**.

Diamond

Daisy

Sweet Pea

Although once thought to bring courage, the diamonds are now viewed as a symbols of love. They are the center piece of many jewelry sets, most notably engagement rings. It is the hardest mineral on the planet and because of this has many industrial uses.

Generally, diamonds are colorless with a high sparkle, but they can be found in varying tints and hues. Perhaps the most famous diamond of all, the blue Hope Diamond, is one such example.

Daisies connote innocence and purity while paradoxically “holding secrets” among friends.

Sweet peas signify blissful pleasure though they can also be used to bid farewell.
